

Technically driven Fashion Technology student with experience in category management, e-commerce operations, and data-driven decision making to drive business growth, optimize assortment strategies, and enhance customer experience in a dynamic retail & ecommerce environment.

EXPERIENCE		
Category & Growth (Ecommerce) Rozana		Dec'25 - Present
Category Planning & Marketplace Operation Acceleration: - Supported Fashion category expansion during marketplace launch phase (0 to 5L+ GMV in Month 1, online contribution scaled from 0.5% to 7.4%). - Assisted in planning and evaluating 100+ SKUs for lingerie category expansion, supporting buying cycles, fixture planning, and layout optimization to improve in-store visibility. - Built standardized buying templates to structure data capture across pricing, margin, and assortment variables, improving decision turnaround. - Contributed to SKU go-live tracking and catalog hygiene during marketplace onboarding. - Supported execution of sale campaigns that delivered 5.6x sales growth, coordinating merchandising and listing readiness. - Assisted in marketplace operations during 18% category conversion improvement phase, ensuring alignment between offline assortment and online availability.		
Industrial Engineer Intern Brandix, India		July'25– Aug'25
Redefining Skill Matrix- Objective Skill Evaluation through Operation Criticality Classification - Identified subjectivity gaps in traditional operator skill assessment systems affecting allocation accuracy and performance visibility. Developed an operation-criticality classification framework using measurable parameters to standardize skill evaluation criteria. - Refined objective skills assessment by transitioning from coarse 5-point (0, 25, 50, 75, 100) evaluations to a precise two-decimal-point calculation system reducing subjectivity. - Designed a structured skill-matrix system enabling objective performance comparison and data-driven decision making. Built a scalable evaluation framework supporting dynamic operator allocation, efficiency optimization, and workforce productivity improvement. FLRSC Ringer Stopper Attachment -Ergonomic Productivity Optimization - Increased bottleneck operation efficiency by (15.7%) and reduced operator fatigue by (25%) via FLRSC Ringer Stopper Attachment. Reduced manual handling effort by 20% through method redesign and workstation reorganization. Improved cycle-time consistency by eliminating repetitive strain movements (that can lead to Musculoskeletal Disorder) identified during time study analysis. Bundle Handling & Material Flow Optimization -Lean Implementation - Reduced hidden line delays by standardizing bundle movement using visual flow controls and lean principles. Improved material traceability and flow clarity, minimizing bundle misplacement and handling inefficiencies. Enhanced pilot-line productivity through structured flow design validated during implementation phase. Wearable Trim Waste Apron -Shopfloor Efficiency Innovation - Decreased operator motion waste by 25% by introducing a wearable waste-collection system eliminating repeated disposal trips. Improved workstation cleanliness and safety compliance by reducing floor trim accumulation. Optimized task continuity, enabling operators to maintain uninterrupted production flow. Detachable Lace/Elastic Tray -Material Feeding Efficiency - Reduced material search and handling time by ~30% by engineering a detachable trim-presentation tray for sewing operators. Improved workflow continuity through structured trim organization, minimizing operation interruptions. Enhanced operator precision and feeding speed, supporting higher line productivity.		
Textile Intern Vardhman Fabrics Bhopal, India		Jun'24 – July'24
Product Development Cell Impact Of Yarn Quality/Spinning Method on Physical and Test Properties of Fabric Analyzed fabric physical properties using different yarns and spinning methods. Evaluated tear and tensile strength, durability, and processing impact on quality for optimal fabric properties.		
Marketing Intern Project Purkul		July'23 – Aug'23
Business Development & Training Improved job prospects for 360 rural individuals by launching a skill development project. Empowered rural communities through skill development, education, and sustainable practices. The initiatives focus on creating employment, especially for women, through tailoring, handicrafts, and eco-friendly projects, driving inclusive growth and self-reliance in underserved areas.		
EDUCATION		
EXAMINATION	INSTITUTION	YEAR
B.F.Tech	National institute of Fashion Technology (NIFT)	2026
CERTIFICATION & AWARDS		
WorldSkills India 2026	Won the Gold Medal in the WorldSkills India Competition, National Round 2025-2026 and will be representing India in the skill of Retail Sales on the Global Worldskills platform in Shanghai, China 2026.	
Research Publication	Co-authored Technological Advancements and the Role of AI in Textiles published in the International Journal of Clothing Science and Technology (Emerald Publishing)	
PJMT Zonal 2026	Secured 2 nd place in Prem Jain Memorial Trust (PJMT) competition Zonal Round.	
WorldSkills India 2024	Secured Medallion of Excellence at the National Level under Fashion Technology Category.	
Stanford University	Supervised Machine Learning: Regression and Classification Certification	
IBM	Introduction to Artificial Intelligence (AI) Certification	
Copenhagen Business School	Sustainable Fashion Certification	

Research Presentation	- Presented “Significance of Indian Traditional Textiles for Cultural Representation” at the 15th International Congress on Culture, Tourism, and Civilization, held on October 18-20, 2024, at Bitlis Eren University, Türkiye. - Presented "Design of AI Enabled Wardrobe for Ease of Life and Enhance Product Life Cycle" at the International Art and Design Symposium, held on October 24–25, 2025, at Istanbul Arel University, Turkey.
SKILLS	
Technical Skills: - Analytics & Data Management: Google Analytics, SQL, MS Suit, RStudio - Advanced Excel & Power BI – Data analytics, business reporting, and performance dashboards - Programming languages: Python, Java, Web Development - Industrial Software: Lectra, Fast React, Auto CAD, Datatex NOW, Figma	Core Competencies: - E-commerce Operations Management - Business Growth & Marketplace Strategy - Data-Driven Decision Making - Process & Systems Optimization - User Experience Strategy - Strategic Pricing & Inventory Management - Garment Manufacturing & Pattern Making - Tech- Pack Development - Project Management
